

BRAW review. On iPhone, on set.

The first native BRAW viewer and grading workflow built for iPhone. Open your camera originals from Files or an SSD, review the take, make the call, and keep the shoot moving.

01

OPEN

Open .braw from Files or SSD. Browse folders, scrub with timecode and play original audio.

02

INSPECT

Read clip metadata. Monitor with focus peaking, zebra, false color and a live luma histogram.

03

HAND OFF

Mark the take, capture stills, create proxies and export without returning to the laptop.

BUILT FOR THE WHOLE ON-SET DECISION

RAW

ISO · WB · TINT · GAMMA · COLOR SPACE

GRADE

3D LUTS · LIFT/GAMMA/GAIN · CURVES · PRESETS

DELIVER

TRIMS · PROXIES · PRORES · HEVC · H.264

Designed for DITs, cinematographers, camera assistants and small crews.

Markers · BRAW sidecars · batch tools · FCPXML · ASC-CDL · PDF reports · audio-only export.

AVAILABLE ON THE APP STORE

apps.apple.com/app/blackraw-visor-braw-player/id6762029137

Open the original. Trust the image. Make the decision on set.
